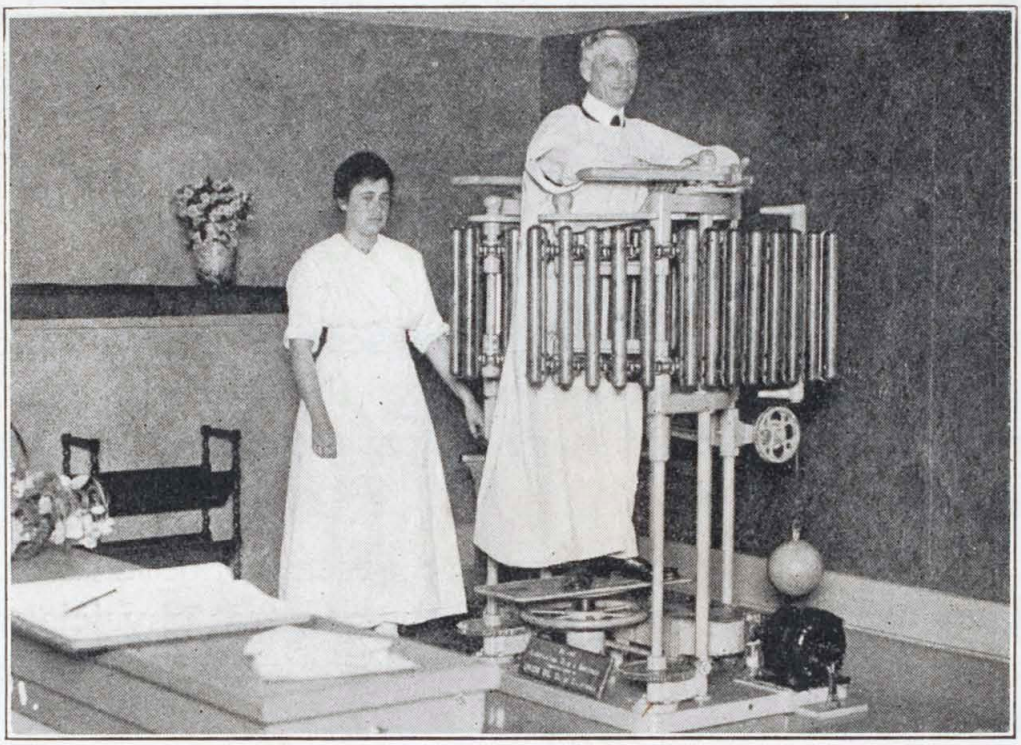
The Gardner Reducing AND Health Building Machine



THIS scientific, simple and sturdy machine, hailed now as a boon to mankind, is nothing more nor less than a common sense device for the application of a mechanical massage which could be gained in no other way. Instead of rolling on the floor, as physicians and beauty doctors advocate, this twentieth century system makes it pos-

sible, so to speak, to "roll the floor on you" without the slightest discomfort—in fact, the process produces exhilaration, yields comfort, soothes the nerves and revolutionizes your sluggish blood circulation to your very distinct joy.

These machines are not exclusively for the use of the corpulent—they are an unparalleled boon to the weak and anemic—the under-nourished and the sleepless, restless man or woman. The tragedy of being fat is bad enough, but that other and perhaps sadder tragedy of wasting away for lack of proper blood circulation, is perhaps worse.

These machines, now at the service of the public in most of the important cities of the United States, including San Diego, have no parallel and occupy a field by themselves.

They do the work where given a fair chance. They are ethical, endorsed by the greatest physicians in the country, and cannot possibly cause distress or any ill effect.

Are you interested?

If so, leave with us your name and address and we will mail you full particulars.
